Spring 2025, CSE 4510
Online Assignment on Bash Scripting

Time: 40 minutes

Section C

   After finishing graduation from CSE, UIU, you joined NSI. You are on a mission in our enemy country. There you luckily got access to a directory with many sub-directories, where there are many files. These files are very confidential as they contain information about their evil bioweapon developed using various viruses. You are particularly interested in some viruses listed in **virus.txt**. Copy those files that contain the name of any of the viruses listed in **virus.txt**.
   Do it fast, or else the owner will know about your deeds, and both your life and our country will be in danger.

Output

Files should be copied in **output_dir** folder.

Instructions

Please note that any usage of the internet is strictly prohibited during the assignment. Use of any unfair means will be duly punished.
   Please submit the source code in elms. Failure to submit in the elms will result in a mark deduction.
